Abstract

\$MRH is a simple meme coin on Solana. It's fun, community-led, and inspired by clean energy memes. Total supply starts at 1 billion tokens, but we can issue more as rewards to grow the community. We launched fairly on Pump.fun with no presales. It has a small tax that burns tokens and rewards holders. We give out tokens through staking, contests, and airdrops. No rug pulls-liquidity is locked, and ownership is given up. Our goal: Launch, learn from the community, grow together, reward holders, and have fun without scams.

1. Introduction & Vision

We're in a world needing fun and fair crypto. \$MRH brings Mr. Hydrogen-a comic hero who gets powers from a hydrogen experiment to fight pollution. He saves the day (and his wife) with energy tricks. A meme coin.

\$MRH mixes memes with simple rewards:

- Meme Fun: Like PEPE, we use comic stories for hype, no insider sales.
- Rewards: Give tokens for holding, contests, and community help.
- Green Touch: Small fees go to eco-charities.

Vision: A basic meme coin that grows by learning from users, issuing rewards, and staying fair. No big industrial stuff-just community and memes.

2. Problem Statement

- Most meme coins crash from scams, no real use, or bad teams.
- Crypto can seem shady with energy waste and distrust.

\$MRH attempts to address this with fair launch, rewards, and clear rules. No rugs, just growth.

3. The Mr. Hydrogen Story & Use

3.1 Comic Memes

- Story: Dr. Leo Phi becomes Mr. Hydrogen after a lab boom. He flies, senses pollution, and zaps energy. Fights bad guys to save his wife and the planet.

(See comic 1 @ Amazon.com - <https://a.co/d/6gcjNF1>)

- Memes: Turn comic scenes into NFTs and share for fun and hype.

Use: Hold for reflections, stake for more tokens, join contests for rewards. We issue extra tokens as prizes to keep it growing.

4. Tech & Security

- Chain: Solana (fast, cheap fees).

- Type: SPL token.

- Launch: Fair on Pump.fun with price curve.

- Features:

- 3% tax on buys/sells (1% burn, 1% marketing/team, 1% to holders).

- Locked vesting for team and charity.

- Multi-sig safe for funds (needs 3/5 okays).

- Can mint more for rewards via DAO votes.

- Safety: Audited by CertiK, liquidity locked 12 months, ownership renounced.

5. Tokenomics & How Tokens Are Given Out

Start with 1 billion tokens. Deflationary burn, but we can issue more for rewards (up to 10% yearly via DAO).

Category	% of Start Supply Tokens		How It Works
Liquidity & Community	50%	500,000,000	Right away; locked LP; staking rewards.
Grants & Rewards	15%	150,000,000	Locked; release quarterly with DAO ok for prizes.
Marketing & Fun	10%	100,000,000	Vest over 6 months; for NFTs, contests, influencers.
Team & Advisors	20%	200,000,000	3-month wait, then 12-month slow release.
Charity	5%	50,000,000	Locked; quarterly to rescue slaves / NGOs.
Total	100%	1,000,000,000	

Burn reduces supply; rewards issue new ones to grow.

6. Community & Marketing Plan

Pre-Launch (September 2025)

- Share comic teasers and memes.

- Build Telegram to 1,000+.

Launch (October 8, 2025)

- Fair on Pump.fun, lock LP.

Post-Launch (Q3–Q4 2025)

- Meme edit contests.
- Airdrop comic NFTs to early holders.
- Influencer pushes on X, YouTube.
- Eco challenges (e.g., plant trees) with token rewards.

Long-Term (2026+)

- More rewards for community ideas.
- DAO for decisions.
- Issue extra tokens for growth events.

Goals: 50,000 holders, 1 million views by Q4 2025.

7. Roadmap

Phase	Time	Key Steps
Phase 1 – Launch	Oct 2025	Pump.fun launch; lock LP; airdrops; social start; NFT drops.
Phase 2 – Growth	Oct–Dec 2025	DAO setup; reward grants; eco contests; push for exchanges.
Phase 3 – Use	Jan–Mar 2026	Staking site; reward pilots; DAO votes on issues.
Phase 4 – Scale	Jul–Dec 2026+	AR fun; partnerships; merch; DAO updates; more rewards.

8. Team & How Decisions Are Made

Team

- Creator: Timothy C. Williams, made the comic, plus Jon Bianco, co-owner, who advises.
- Devs: Solana team with 1+ year experience.
- Advisors: Eco expert (Charity: Water), finance pro

Decisions

- DAO: Holders with 0.1%+ can suggest rewards or changes.
- Voting: Free off-chain on Snapshot for charity and tweaks.

9. Risks & Fixes

Risk	Fix
Price Swings & Dumps	Locked LP; vesting; anti-big-seller rules.
Code Bugs	bug bounties; no owner control.
Rules Changes	KYC for partners; US company.
Fund Mess-Ups	Quarterly checks; on-chain proofs; spread funds.
Big Sells	Limits per trade; dynamic taxes.

10. FAQ

Q: How to buy \$MRH?

A: On Pump.fun at launch, then Raydium. See site for wallet.

Q: What's the 3% tax?

A: 1% burn, 1% marketing/team, 1% to holders.

Q: How do charities get money?

A: Locked, quarterly to Charity NGOs: Rescue via Ans. Int'l, and multi-sig.

Q: Risks?

A: Crypto is risky-prices drop, rules change. Do your own research.

Q: How to get rewards?

A: Through staking, contests, airdrops-join community for details.

11. Legal Note

This is info only, not advice to buy/sell. Crypto like \$MRH can lose all value due to market, rules, etc. Research and talk to experts. We follow laws like KYC/AML where needed. All art © 2023–2025 Mr. Hydrogen TM, – All Rights Reserved, presented by **Mr. Hydrogen Meme Coin, LLC**.

12. Wrap-Up

\$MRH is a fun meme coin with Mr. Hydrogen vibes. We launch fair, learn and grow with the community, issue rewards, and avoid rugs. Join for memes, gains, and good times.
